IMD PREDICTS HEAVY RAIN IN PENINSULAR REGION TODAY

Jayashree Nandi

letters@hindustantimes.com

NEW DELHI: The depression over west central Bay of Bengal has intensified into an intense low-pressure system that will bring heavy to extremely heavy rain in parts of peninsular, central India and the west coast, the India Meteorological Department (IMD) said on Monday.

The deep depression is likely to move west-north-westwards and cross north Andhra Pradesh coast between Narsapur and Visakhapatnam early on October 13 as deep depression with a maximum wind speed of 55 to 65 kmph gusting to 75 kmph.

The deep depression that is centred about 250 km south-south-east of Visakhapatnam, 290 km east-southeast of Kakinada and 330 km east-southeast of Narsapur is likely to bring widespread and heavy to extremely heavy rain (over 20 cm) in many places over east & west Godavari, Visakhapatnam, Vijayanagaram, Srikakulam districts of north coastal Andhra Pradesh, Yanam, Ganjam, Gajapati, Koraput and other parts of south Odisha, coastal Andhra Pradesh, Rayalaseema, Telangana, south Konkan, Goa, south Madhya Maharashtra, Marathwada, Karnataka, north Kerala, south Chhattisgarh etc from October 12 to 14.

Heavy rain across city, more likely for two days

BENGALURU, DHNS

Hheavy evening rain brought down trees, inundated streets and disrupted traffic in many parts of the city on Saturday. The met department has forecast moderate rainfall for Bengaluru for two more days.

The city started receiving showers on Friday night owing to a depression in the Bay of Bengal. The Saturday sky, which remained overcast until late afternoon, gave in to widespread rainfall, thunder and lightning towards the evening.

Jayanagar, Basavanagudi, BTM Layout, HSR Layout, Bommanahalli, Bannerghatta Road, parts of Vijayanagar, Kengeri, RR Nagar and the surrounding areas, parts of Koramangala and Madiwala, Malleswaram, Yeshwantpur, Yelahanka, Horamavu and many other areas received heavy rainfall. Many parts of southern Bengaluru received rainfall ranging from 20 mm to 44 mm.

As of 10 pm, Vyalikaval received the most rainfall at 71.5 mm, according to the

Karnataka State Natural Disaster Monitoring Centre (KSNDMC). "Widespread light to moderate rains associated with thunder activity (are) very likely over the BBMP area" until 8.30 am, October 13, it said in a statement.

The rains brought along with them tree falls and damage to infrastructure. Officials in the BBMP control room said three complaints of tree fall were reported: one near the JC Nagar police station and another in RT Nagar 2nd Block, both of which have been cleared. The third tree fall was reported from Thimmaiah Road, Shivajinagar. It's unclear if the fallen tree was removed. There were no reports of flooding or damage caused by tree falls, the officials added.

Many citizens took to the social media to complain about flooded streets and power outages. Borewell Road, near Sheelavanthakere Lake in Whitefield, was filled with up to three feet of water, leading to traffic diversions in the IT hub. Similar scenes were seen on Magadi Road.
