## Heavy rain lashes Telangana, parts of A.P.

Continuous inflows into Himayatsagar; one dies in A.P.

SPECIAL CORRESPONDENT  
HYDERABAD

Heavy rain pounded various parts of Telangana on Friday and Saturday with 15 places recording rainfall in excess of 10 cm.

The State government put all the District Collectors on high alert with more rain forecast in the next three days. Chief Secretary Somesh Kumar issued orders asking officers to stay put in their headquarters and take measures to ensure that there is no loss of life and property. He also ordered cancellation of leave and permission for public holidays to all officers in districts.

**Gushing out:** Flood water being discharged downstream of the Prakasam Barrage in Vijayawada on Saturday. ■ V. RAJU

Revenue authorities have been kept on high alert on Saturday night, owing to the possibility of lifting the flood gates of the Himayatsagar reservoir, letting out huge quantities of water into Musi river.

Several mandals in the West Godavari district of Andhra Pradesh received

good rainfall in the last two days, and many streams and rivulets are overflowing snapping road links to many habitations.

One person was washed away and three were rescued when their car slipped and fell into a stream near Ramachandrapuram village in Buttaigudem mandal on Fri-

day night. The victim, Kancharla Ramarao, was a native of Pandirimamidigudem village.

Home and Disaster Management Minister Mekathoti Sucharita said heavy rain was forecast for Krishna, West Godavari, Guntur, Nellore, Prakasam and other districts and moderate rainfall in other parts of the State.

Collector A.Md. Imtiaz said due to the continuous downpour in the catchment areas many streams were in spate and the inflows into Krishna river were increasing. "At present the discharge from Prakasam Barrage was 1.40 lakh cusecs and by Sunday morning it is likely to be 3 lakh cusecs," he said.

### Flood havoc

Floods are cause of perennial sorrow in Bihar, where 28 of the 38 districts are marked flood-prone. This year, though, the floods were more severe than usual and people were already struggling to deal with the pandemic. At least 8.3 million people were displaced, and many are living in relief camps still.

The Opposition claims politicisation of relief, while the government blames earlier regimes for weak embankments and corruption.
