Rains recede, leave behind a trail of destruction

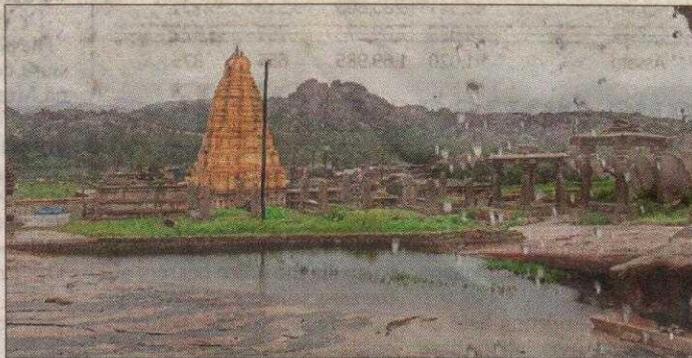

VIJAYAPURA/HOSAPETE/RAICHUR/BIDAR, DHNS: Showers gave a break on Sunday after battering the north Karnataka districts for two days. The torrential rain that lashed Kalyana Karnataka and Mumbai Karnataka districts on Friday and Saturday has left behind a trail of destruction.

A 11-year-old girl died after a portion of her house wall, weakened by a prolonged wet weather, fell on her at Donkamadu in Muddebihal taluk, Vijayapura district, in the early hours of Sunday. While Maremma Hulagappa Bijjur died, another girl Rekha Lotageri suffered serious injuries in the incident, Vijayapura DC P Sunil Kumar told reporters.

As many as 303 houses in the district have suffered partial damage while three houses collapsed completely, the DC said.

Parts of Vijayapura district, including the city, continued to receive sporadic spells of showers on Sunday. Talikote recorded 4.5 cm of rain while Dhavalgi and Devara Hippargi received 4 cm and 3 cm of rainfall respectively.

nessed showers for the third consecutive day on Sunday. More than 100 houses have been damaged due to incessant showers in the taluk.

Parts of Belagavi and Dharwad districts also received light to moderate showers in the day.

Meanwhile, relief centres have been opened at the rain-hit areas, including Kakanakere, Basavanabhavi Circle and Hegganahalli, in Raichur.

The city and surrounding areas had witnessed torrential rain on

Friday and Saturday, leaving the low-lying areas and vast tracts of farmlands waterlogged. According to the district administration, in Raichur taluk alone more than 500 houses have been damaged.

A 19th century banyan tree, planted by Nawab Nasir-ud-Dowla, near Rangeen Mahal in Bidar fort precinct, was relegated to history books.

The tree, weakened by thunderstorms that lashed the city in the last two months, collapsed on Saturday.

3.18 lakh people hit by fresh Assam floods

Deluge, landslide-related death toll at 145; 389 villages inundated in 13 districts

SPECIAL CORRESPONDENT GUWAHATI

Another wave of floods triggered by heavy rain has affected 3.18 lakh people across 13 districts of Assam.

A spokesperson of the Assam State Disaster Management Authority (ASDMA) said a person drowned on Monday at Raha in central Assam's Nagaon district, taking the death count to 119. Rain-induced landslides have killed another 26 people since May 22.

Third wave
"This is the third wave of floods that first struck parts of the State almost a week ago," she said.

Data provided by ASDMA

said 389 villages and localities have been inundated in the 13 districts. The worst affected district was Nagaon, followed by the adjoining Morigaon in central

Assam and Dhemaji in north-eastern Assam. The other affected districts were Lakhimpur, Biswanath, Kamrup, Hojai, Majuli, Jorhat, Sivasagar, Tinsukia, Di-

brugarh and West Karbi Anglong.

Major rivers such as Brahmaputra, Kopili and Jia-Bharali were flowing above the danger level at some places. The floodwater damaged some roads and bridges and standing crop on 13,463 hectares, the ASDMA said in a report.

13 relief camps set up

The authorities have set up 13 relief camps in Lakhimpur, Nagaon, Tinsukia and West Karbi Anglong. Personnel of the National Disaster Response Force and the State Disaster Response Force rescued 48 people in four districts, the report said.

Monsoon set to depart after a poor Sept

TIMES NEWS NETWORK

New Delhi: The southwest monsoon has withdrawn from parts of west Rajasthan and Punjab and is expected to withdraw from the capital in the next two to three days, IMD has forecast.

While the normal date for monsoon withdrawal for Delhi is September 25, the late withdrawal this time has not benefi-

IMD SCIENTIST SAYS
Delhi is expected to record the withdrawal of monsoon in the next two to three days

ted the capital, which only received three "rainy" days this month. This week's forecast also shows no rain, with tempe-

ratures likely to remain high.

Kuldeep Srivastava, scientist at IMD, said: "We have already seen the southwest monsoon withdraw from parts of Punjab and west Rajasthan and it could withdraw further. Delhi, like Haryana, is expected to record the withdrawal of monsoon in the next two to three days and we expect no further showers this week."

Srivastava claimed that the

lack of rain this month has partly to do with the fact that the monsoon trough moved southwards of NCR, thereby not providing the region enough rain in the capital region. "Generally, showers are recorded even during the withdrawal period, but a rain spell until October 4 is unlikely," he added.

The city has so far received 467.7mm of rainfall as against a normal mark of 583.1mm.
