#### **CWC** Inference:-

QPF as received from IMD is given above. Light rainfall (11-25 mm) is predicted in sub catchments of Upper Godavari, Pravara, Middle Godavari, Maneru, Lower Godavari and Sabari on Day 1, Lower Godavari on Day 2 of Godavari Basin.

Moderate rainfall (26.0-37.0 mm) is predicted in sub catchment of Indravathi on Day 1 of Godavari Basin.

Remaining catchments will receive very light rainfall (0.1-10mm) for the remaining days.

Due to heavy rains in Upper Godavari all sites rising from Nasik to Jaikwadi will rise, so be watchful.

As PVNRaoKantapally (Sammakka Barrage), is passing (5,98,700 Cusecs) water due to inflows into the barrage, the same will reach downstream and water levels of downstream sites may be watchful. hence it is advised that the sites from Perur to Dowlaiswaram to be watchful.

Reservoirs shown in red are having live storage greater than 90%, reservoirs shown in orange are having Live storage greater than 75% and the reservoirs shown in yellow are having live storage greater than 70%. Close watch has to be maintained at these reservoirs wherever Heavy Rainfall (Yellow) and Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 24 hours are given (last column of Table above).

NOTE: Based on above information, Project Authority may regulate the reservoirs as per standard operating manuals/ rule levels to avoid downstream flooding and upstream submergence.
