#### **CWC Inference:-**

QPF as received from IMD is given above. very light rainfall (0.1-10mm) is predicted in sub catchments of on Day 1 to Day 5 of Godavari Basin.

Due to heavy rains in Upper Godavari all sites rising from Nasik to Jaikwadi will rise, so be watchful.

As PVNRaoKantapally (Sammakka Barrage), is passing (5,51,500 Cusecs) water due to inflows into the barrage, the same will reach downstream and water levels of downstream sites may be watchful. hence it is advised that the sites from Perur to Dowlaiswaram to be watchful.

Close watch has to be maintained at these reservoirs wherever Heavy Rainfall (Yellow) and Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 24 hours are given (last column of Table above).

NOTE: Based on above information, Project Authority may regulate the reservoirs as per standard operating manuals/ rule levels to avoid downstream flooding and upstream submergence.
