#### **CWC Inference:-**

QPF as received from IMD is given above. Light rainfall (11-25 mm) is predicted in sub catchments of Pravara and Manjira on Day 1, Upper Godavari, Pravara, Purna, Manjira, Middle Godavari on Day 2, Middle Godavari on Day 3, Middle Godavari, Maneru and Sabari on Day 4, Indravathi and Sabari on Day 5 of Godavari Basin.

Moderate rainfall (26.0-37.0 mm) is predicted in sub catchments of Indravathi on Day 3 and Day 4 of Godavari Basin.

Remaining catchments will receive very light rainfall (0.1-10mm) for the remaining days.

Waterlevels may rise slowly from Day 1 to Day 5 due to rainfall in sub catchements of Godavari Basin. As PVNRaoKantapally (Sammakka) Barrage, is passing (98,045 Cusecs) water due to inflows into the barrage, the same will reach downstream and water levels of downstream sites will rise, hence it is advised that the sites from Kaleswaram to Dowlaiswaram to be watchful.
