#### **CWC** Inference:-

QPF as received from IMD is given above. Light rainfall (11-25 mm) is predicted in sub catchments of Manjira, Middile Godavari and Maneru on Day 2, Upper Godavari, Purna, Maneru and Indravathi on Day 3, Upper Godavari, Pravara, Purna, Manjira, Middile Godavari and Maneru on Day 4, Maneru, Lower Godavari and Sabari on Day 5 of Godavari Basin.

Moderate rainfall (26.0-37.0 mm) is predicted in sub catchment of Middile Godavari on Day 3 of Godavari Basin.

Remaining catchments will receive very light rainfall (0.1-10mm) for the remaining days.

As PVNRaoKantapally (Sammakka Barrage), is passing (2,15,300 Cusecs) water due to inflows into the barrage, the same will reach downstream and water levels of downstream sites may be watchful. hence it is advised that the sites from Perur to Dowlaiswaram to be watchful.

Reservoirs shown in red are having live storage greater than 90%, reservoirs shown in orange are having live storage greater than 75% and the reservoirs shown in yellow are having live storage greater than 70%. Close watch has to be maintained at these reservoirs wherever Heavy Rainfall (Yellow) and Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 24 hours are given (last column of Table above).

NOTE: Based on above information, Project Authority may regulate the reservoirs as per standard operating manuals/ rule levels to avoid downstream flooding and upstream submergence.
