#### **CWC** Inference:-

QPF as received from IMD is given above. Light rainfall (11-25 mm) is predicted in sub catchments of Middle Godavari, Maneru, Lower Godavari, Indravathi and Sabari on Day 4, Middle Godavari, Maneru and Sabari on Day 5 of Godavari Basin.

Moderate Rainfall (26-37 mm) is predicted in sub catchment of Indravathi on Day 5 of Godavari Basin.

Remaining catchments will receive very light rainfall (0.1-10mm) for the remaining days.

Waterlevels may rise slowly from Day 4 to Day 5 due to rainfall in sub catchements of Godavari Basin. As PVNRaoKantapally (Sammakka Barrage), is passing (4,40,550 Cusecs) water due to inflows into the barrage, the same will reach downstream and water levels of downstream sites will rise, hence it is advised that the sites from Kunavaram to Dowlaiswaram to be watchful.
