CWC Inference:-

QPF as received from IMD is given above. Light rainfall (11-25 mm) is predicted in sub catchments of Upper Godavari, Pravara, Purna, Manjira, Middle Godavari, Maneru on Day 1, Pravara, Indravathi and Sabari on Day 2, Manjira on Day 3 of Godavari Basin.

Moderate rainfall (26.0-37.0 mm) is predicted in sub catchment of Lower Godavari on Day 1, Upper Godavari and Purna on Day 2, Upper Godavari, Pravara and Purna on Day 3 of Godavari Basin.

Heavy rainfall (38.0-50.0 mm) is predicted in sub catchment of Indravathi on Day 1, Lower Godavari on Day 2 of Godavari Basin.

Heavy to very Heavy rainfall (51.0-75.0 mm) is predicted in sub catchment of Sabari on Day 1, Manjira, Middle Godavari, Maneru on Day 2 of Godavari Basin.

Remaining catchments will receive very light rainfall (0.1-10mm) for the remaining days.

Due to cyclone Gulab, the catchments of Sabari and Indravathi will receive heavy rainfall, so the sites in the catchment be watchful.

As PVNRaoKantapally (Sammakka Barrage), is passing (3,31,500 Cusecs) water due to inflows into the barrage, the same will reach downstream and water levels of downstream sites will rise considerably, hence it is advised that the sites from Perur to Dowlaiswaram to be watchful.

Reservoirs shown in red are having live storage greater than 90%, reservoirs shown in orange are having Live storage greater than 75% and the reservoirs shown in yellow are having live storage greater than 70%. Close watch has to be maintained at these reservoirs wherever Heavy Rainfall (Yellow) and Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 24 hours are given (last column of Table above).

NOTE : Based on above information, Project Authority may regulate the reservoirs as per standard operating manuals/ rule levels to avoid downstream flooding and upstream submergence.
