CWC Inference:-

QPF as received from IMD is given above. Light rainfall (11-25 mm) is predicted in sub catchments of Purna and Manjira on Day 1, Pravara, Manjira, Lower Godavari, Indravathi and Sabari on Day 2, Upper Godavari, Pravara, Purna, Manjira, Maneru and Sabari on Day 3, Middle Godavari, Lower Godavari, Indravathi and Sabari on Day 4, Middle Godavari, Lower Godavari and Indravathi on Day 5 of Godavari Basin.

Moderate rainfall (26.0-37.0 mm) is predicted in sub catchments of Middle Godavari, Maneru, Lower Godavari, Indravathi and Sabari on Day 1, Upper Godavari, Purna and Maneru on Day 2, Middle Godavari on Day 3 of Godavari Basin.

Heavy rainfall (38.0-50.0) is predicted in sub catchments of Middle Godavari on Day 2 of Godavari Basin.

Remaining catchments will receive very light rainfall (0.1-10mm) for the remaining days.

As PVNRaoKantapally (Sammakka Barrage), is passing (1,14,200 Cusecs) water due to inflows into the barrage, the same will reach downstream and water levels of downstream sites will rise considerably, hence it is advised that the sites from Perur to Dowlaiswaram to be watchful. SRSP has reached its FRL on 24-08-2021 at 07:00 hrs. As per rule curve the operations may be maintained and level may be reduced.

Reservoirs shown in red are having live storage greater than 90%, reservoirs shown in orange are having live storage greater than 75% and the reservoirs shown in yellow are having live storage greater than 70%. Close watch has to be maintained at these reservoirs wherever Heavy Rainfall (Yellow) and Very Heavy Rainfall (Orange) and Extremely Heavy Rainfall (Red) warning in next 24 hours are given (last column of Table above).

NOTE: Based on above information, Project Authority may regulate the reservoirs as per standard operating manuals/ rule levels to avoid downstream flooding and upstream submergence.
