Dept. of Water Resources, River Development & Ganga Rejuvenation.**

FOREWORD

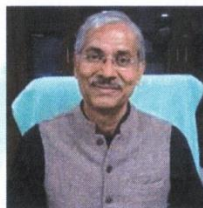

Central water Commission (CWC) is the apex organization in the country dealing with collection and compilation of river discharge data on important rivers across India. The need for conservation of water cannot be over emphasized. Quantity of water needs to be estimated accurately for proper planning and its management. Since 1945, CWC is committed for assessment, planning and management of surface water endowed to this great country.

Hydrological data observation is specialized work and Central Water Commission (CWC) is doing it since 1948. CWC has developed enough expertise through its network of hydrological observation stations and has got trained manpower. At present, CWC maintains a network of 1543 hydro-meteorological observation sites in the country distributed among 14 regional offices headed by Chief Engineers. This data is being utilized by CWC for issuing flood forecasts and for issuing advance warning to the state authorities during high flood situation besides planning and development of water resources projects in the country by various State & central Government agencies and public sector undertakings and also for research purposes by private and govt. research Institutes.

I appreciate the efforts made by RM Wing officials Sh. Ranjan Kumar Sinha, Member (RM); all field Chief Engineers; Sh. Reading Shimray, Chief Engineer (P&D) and Sh. Pankaj Kumar Sharma, Director, RDC2 in publishing this book of 1543 HO sites.

I hope this book would be found useful by all the offices of CWC, Central / State agencies and other stakeholders, who are engaged in the planning and development of Water Resources in the Country.

(Saumitra Kumar Haldar)
Chairman

**Member (River Management), Central Water Commission
& Ex-Officio Additional Secretary to the GoI,
Dept. of Water Resources, River Development & Ganga Rejuvenation**

PREFACE

The system of publication of Hydro-meteorological Observation Stations books in CWC dates back to older times. There is record of a publication titled "Key Hydrological Observation Stations in India under Central Water Commission" published in April 1991. Thereafter, another book titled "Key Hydrological Observation Stations in Peninsular River Basins of India under Central Water Commission" was published by River Data Directorate in April 1992. Thereafter, a book titled a book on 'Hydrological Observation Stations in India under Central Water Commission' was published in 2004 giving details of 945 hydrological observation stations as on 01.01.2003. The next edition of this book was published in August, 2011 giving information of the sites as on 1st January, 2010. At that time, CWC was maintaining a network of 866 hydrological observation stations. In the edition published in October 2012, details of 878 hydrological observation stations maintained by CWC as on 01.06.2012 were presented. The last publication of HO book was done in November, 2020 which contained the details of 1548 HO sites.

The recent administrative re-organization and re-distribution of HO sites in the erstwhile B&BBO, Shillong during December 2020 and the optimization of HO sites at the regional level of CWC had all led to changes in statistics with respect to the state-wise / basin-wise distribution of HO sites. All these changes upto 01.01.2021 have been incorporated in this latest publication. This book contains details of 1543 HO sites, out of which there are 451 nos. of gauge; 403 nos. of gauge & discharge; 183 nos. of gauge, discharge & water quality; 37 nos. of gauge, discharge, & sediment; 370 nos. of gauge, discharge, water quality & sediment; and 99 nos. of gauge & water quality stations.

I appreciate the commendable efforts put by Shri Reading Shimray, Chief Engineer (P&D); Shri Pankaj Kumar Sharma, Director; Sh. Rakesh Kumar Gupta, Deputy Director and Smt. Greeshma Krishnan, Asst. Director-II of RDC2 Directorate in bringing out the updated version of book of Hydrological Observation Stations.

A. **ABBREVIATION AND NOTATIONS USED FOR HYDROLOGICAL OBSERVATION STATIONS**

In the table depicting details of Hydrological Observation Stations, the different columns indicate as under: -

1. Column No. 1 gives the serial number of site.
2. Column No. 2 gives name of the site.
3. Columns No. 3 'District Name' indicates the name of the district in which the site is located.
4. Column No. 4 'HO/FF/HOIW' shows the status of site as Hydrological Observation/Flood Forecasting/Hydrological Observation for Investigation Work.
5. Column No. 5 'Catchment Area in Sqkm' of the site indicates the catchment area from the origin of the river upto the site in square kilometers.
6. Column No. 6 Indicates the name of the river/tributary/sub-tributary.
7. Column No. 7 'Type' indicates the type of site as:

G	Gauge
GD	Gauge & Discharge
GDS	Gauge, Discharge & Silt
GDSQ	Gauge, Discharge, Sediment & Water Quality
GQ	Gauge & Water Quality
GDQ	Gauge, Discharge & Water Quality

8. Column No. 8 indicates the date of start of observation in the same order as mentioned under the 'Type' column.
9. Column No. 9 indicates the latitude of the site.
10. Column No. 10 indicates the longitude of the site.

Station Code for Stations/Sites of different agencies for WIMS platform

1. 1st & 2nd position of code will be two alphabets representing Agency.

e.g. for Central Water Commission

Complete list is given in the table below:
