# Overflowing rivers submerge bridges, roads in Belagavi, U-K

**BENGALURU:** The water level in River Krishna and its tributaries have increased drastically following the incessant rain in the Western Ghats of Maharashtra.

The swollen rivers have left many bridges and roads in Belagavi district submerged, affecting the road connectivity in the region.

Heavy overnight rain in Khanapur and Londa has upped the water levels in Malaprabha, leaving two bridges in the taluk and one in Bailhongal taluk under water.

A staggering 59,653 cusecs of water was released into downstream at Rajapur barrage in Karnataka-Maharashtra border. Because of huge inflow into River Krishna, six low-lying bridges in Chikkodi taluk - Kallol-Yadur, Karadga-Bhoj, Bhojwadi-Kannur, Sidnal-Akkol, Jatrat-Bhiveshi and Malikwad-Dattawad, are still under water.

**Almatti gets 40k cusecs**  
 Almatti reservoir has continued to receive good inflow. On Monday, 47,302 cusecs of water flowed into the reservoir. The current storage of the dam stands at 39.985 tmcft, an increase of 4 tmcft in 24 hours.

The inflow into the reservoir is expected to go further up in the next four to five days, according to Krishna Bhagya Jal Nigam Ltd.

many parts of Joida taluk in Uttara Kannada has been experiencing downpour for the last three days.

The road connectivity between Jagalpet and Castle Rock has been cut off, causing grave hardships to Ramnagar-bound students and the daily wagers from Kunaguni, Ivoli, Kuveshi, Konashet and surrounding villages. They are forced to take a 20-km detour via Anmod to reach Ramnagar.

## Rains pound Mudigere

Heavy showers continue to pound Mudigere, Kottigehara and Banakal in Chikkamagaluru district. Kottigehara recorded a whopping 11 cm of rain in the last 24 hours (ending at 8 am on Monday).

A portion of a bridge connecting Paisari Darga to

Kunjila in Napoklu, Kodagu district, has caved in following the showers. The water level in Lakshmanateertha river has increased with good spells of rain in its catchment.

Parts of north Karnataka witnessed moderate to heavy showers on Monday. Hubballi and Dharwad cities continued to experience downpour. Showers left the roads and low-lying areas in the twin cities waterlogged, causing inconvenience to the commuters. Light showers, accompanied by gusty winds lashed Hosapete town and surrounding areas. Overcast conditions prevailed through the day in many parts of the Mumbai-Karnataka and Hyderabad-Karnataka regions.

## Heavy Rain Forecast Today, Likely In A Few Short Spells

Vinamrata.Borwankar  
@timesgroup.com

**Mumbai:** Evoking memories of last Monday's downpour, several areas in the suburbs received heavy rainfall on Monday morning, with Santacruz recording 108.2 mm in three hours starting 8.30 am.

By Monday night, Mumbai had recorded over 84% (708.7 mm) of the average July rainfall of 840mm. And receiving 1,315.7 mm since June, the city has recorded over 57% of the average monsoon rain (2,272.2 mm) and 52% of the annual ra-

after 9.15 am. While three arrivals and four departures were cancelled, three other flights were diverted and six flights had to go around and landed in second attempt. Though rain stopped soon after, there was an average 31 minute delay in flight departures till 7 pm, and traffic movement on arterial roads was paralysed for a long time.

The Met department has forecast intermittent rain with heavy to very heavy falls in the island city and suburbs on Tuesday. "Due to active monsoon conditions, entire Konkan coast is experiencing an intense spell of rainfall. Monsoon remained widespread vigorous over the entire North Konkan belt, including Mumbai with heavy to very rainfall over most places," said K S Hosalkar, IMD deputy director-general (western region).

Private forecaster Skymet has said the rain is expected to see a lull later in the week. "For the next 2-3 days i.e. until July 10, moderate rains with few heavy spells would continue over Mumbai and suburbs. These heavy rains would stay for 2-3 hours and would not be a continuous affair throughout the day as seen in last few days. However, they would be able to trigger localized flooding and waterlogging in many areas," said Jatin Singh, founder and managing director, Skymet.

The IMD has also sounded a landslide alert in ghat areas, including the Pune-Mumbai Expressway, Malshej, Khanda-la, Matheran and Tamhini, following heavy to very heavy rainfall in parts of north Konkar and Madhya Maharashtra.

## Asst engineers to be in office at night

In light of the heavy rainfall warning for the next 24 hours, the BMC has asked assistant engineers to stay back in their respective ward offices at night to attend to emergencies, if any. Officials said the presence of a senior officer in a ward office helps mobilize resources faster. BMC has stationed 25 NDRF staff at Kranti Nagar near Mithi. TNN

infal of 2,515 mm.

Similarly, Navi Mumbai received over 90mm in just five hours from 8.30am, triggering traffic chaos on Sion Panvel Highway and Mulund Airoli Link Road.

In the 24 hours ending at 8.30 am Monday, IMD's Santacruz observatory recorded 30.6 mm and the Colaba observatory 54.2 mm.

The morning heavy rain hit flight operations at Mumbai airport as viability dipped
